

Airflow Snorkels

Description:

The Australian continent offers 4WD enthusiasts some of the most rugged, treacherous and challenging adventures in the world. By fitting an AIRFLOW Snorkel you can meet these challenges head on. You will no longer worry about river crossings or kilometres of fine desert dust. An AIRFLOW Snorkel allows your engine to breath easier by drawing clean, fresh air from above the windscreen. Made from high density Polyethylene plastic with U.V. protection from sunlight. An AIRFLOW Snorkel can add years to your engine's life. They are simple to install and look great.
